

Please read all instructions carefully before use and keep them.

This appliance is suitable for natural and bleached or colored hair and on natural hair wigs. Do not however use it on artificial hair wigs or hairpieces, on hair which has been treated with lacquer or setting lotion as this can stick to the barrel, reducing its efficiency.

1. IMPORTANT SAFETY PRECAUTIONS:

For your own protection from injuries and electric shocks, the following information must be observed when using electrical appliance.

WARNING: Do not use this appliance near washbasins or any other container with water. Do not immerse the appliance in water or any other liquid.

This appliance is not suitable for use by people (including children) with physical, sensory or mental disabilities or who do not have the relevant experience or knowledge of using such appliance, unless under the supervision of or after having received instruction in the use of the appliance by an individual who is responsible for their safety. Children should be supervised to ensure they do not play with the appliance. Cleaning and maintenance may not be carried out by children, unless under supervision.

Do not place the applicant on any heat sensitive surface whilst in operation. Avoid all contact with the appliance heated surfaces, in particular, with ears, eyes, face and neck. After use, do not wind the cord around the appliance as this may damage the cord. Instead, roll the cord up loosely and let it hang by the side of the appliance.

Never use the appliance if the mains cable or plug is damaged. Furthermore, do not use the appliance if it has been dropped or if it is damaged. Please give the appliance to an authorized service center for inspection and repair.

Do not expose the appliance to the temperatures below 0° and above +40° C for considerable time.

Do not expose the appliance to the sunbeams.

2. FEATURES:

- Steam function: The steam reduces the risk of burns at higher temperatures, provides additional moistening of the hair and makes it shiny.
- ceramic tourmaline coating – ensures even heat distribution and has an anti-static effect
- the "floating plates" (110 x 32 mm) – evenly distribute the pressure on the hair, thus prevent pulling the hair.
- 5 temperature settings (150°/170°/190°/210°/230° C)
- switch for adding steam
- removable water tank
- cord with swivel coupler, length 2,7 m
- included: cleaning brush for the steam nozzle, pipette (5 ml) for refilling the tank

3. START-UP AND USE:

- The steam hair straightener is equipped with the lock at the bottom of the handle, which keeps the appliance in the closed state. Unlock this before starting work.
- Connect the device to the power supply and push the ON/OFF button. The heating process starts at 150.
- Use the "+" and "-" buttons to set the temperature.
- optimal temperature settings: for fine hair up to 150° C, for normal hair from 170° to 190° C and for thick hair from 210° to 230° C.
- Steam function: Before use, the tank must be filled with distilled water. To remove the tank, move the latch to the "UNLOCK" position and slide it away from the unit. Open the rubber plug on the underside of the tank and fill the water with the pipette. Close the tank with the rubber plug and put it back in the starting position until it clicks into place. The steam switch and indicator light are at the top of the hair straightener handle. The indicator lights when the steam function is activated.
- After use, push the ON/OFF button and unplug the power cord.
- Allow to cool before storing away.

4. MAINTENANCE AND CARE:

Disconnect the appliance from the mains power supply. Clean with a damp cloth or sponge using mild soap. Do not use harsh detergents, solvents or abrasives. To clean the steam nozzle, please use the supplied cleaning brush.

5. WARRANTY:

The guarantee is excluded if: the appliance has been misused or treated carelessly; the appliance has been damaged due to incorrect use, the defect has been caused by failure to observe the operating instructions; repair attempt has been carried out by an unauthorized personnel. Parts that are subject to wear are not included into this guarantee.

Technical Data:

Mains voltage 220-240 V, mains frequency 50 Hz, power 55 W
